Step 1. Project Requirements for Cat Clicker

Visuals

- The application should display a picture of a cat and a number of clicks.
- The specifics of the layout do not matter, so style it however you'd like.

Interaction

- The number of clicks should increment when the cat picture is clicked.

Step 2. New Project Requirements for Cat Clicker

Visuals

- The application should display two cats. Each cat includes
    - o   the cat's name
    - o   a picture of the cat
    - o   text showing the number of clicks
- The specifics of the layout do not matter, so style it however you'd like.

Interaction

- The number of clicks should increment when each cat picture is clicked.

Step 3. Project Requirements for Cat Clicker Premium

Visuals

- The application should display

  - a list of at least 5 cats, listed by name
  - an area to display the selected cat

- In the cat display area, the following should be displayed

  - the cat's name
  - a picture of the cat
  - text showing the number of clicks
- The specifics of the layout do not matter, so style it however you'd like.

Interaction

- When a cat name is clicked in the list, the cat display area should update to show the data for the selected cat.
- The number of clicks in the cat area should be unique to each cat, and should increment when the cat's picture is clicked.
